
N° 1.

GENERAL PHYSICS
C. Wolf: Equation of state for photons admitting to Tsallis statistics ..... 1
Cao xuan Chuan: On quasi-exactly solvable potentials ....................... 9

NUCLEAR PHYSICS
Abdelilah Musa Ali, Yuanfu Hsia, Hairong Shi, Hongbo Huang, Xuefeng Sun and Jun Lin: Use of Monte Carlo method with simulated annealing algorithm in the analysis of Mössbauer spectra ......................... 19

PARTICLES AND FIELDS
N. Barik and R. N. Mishra: Parton distributions in nucleon on the basis of a relativistic independent quark model ............................... 27
Tsao Chang and Guangjiong Ni: An explanation of possible negative mass-square of neutrinos ............................................. 49

ASTROPHYSICS
F. Rahaman, S. Chakraborty, N. Begum, M. Hossain and M. Kalam: A study of four and higher-dimensional cosmological models in Lyra geometry 57

N° 2.

GENERAL PHYSICS
D. Jana: On a novel regularization scheme .................................. 63

NUCLEAR PHYSICS
V. A. Bondarenko, J. Honzátko, V. A. Khitrov, A. M. Sukhovoj and I. Tomandl: Cascade $\gamma$-decay of the $^{193}$Os compound nucleus and some aspects of dynamics of change in nuclear properties below $b_n$ .......... 83

PARTICLES AND FIELDS
H. Roy, S. K. Biswas and V. P. Gautam: Study of radiative B decay considering two-Higgs-doublet models and the fourth generation in quark sector ................................................................. 103
P. Guptaroy, Bh. De, S. Bhattacharyya and D. P. Bhattacharyya: Multiple pion and kaon production in high energy nucleus-nucleus collisions: measurements versus specific models ........................................ 115

N° 3.
GENERAL PHYSICS

C. Wolf: Corrections to the high frequency tail of the black body spectrum due to three alternative statistics .......................... 135

NUCLEAR PHYSICS

ASTROPHYSICS

F. Rahaman and S. Mal: Global monopole in Einstein-Cartan theory based on Lyra geometry ................................................. 149

Sh. Deo and K. D. Thengana: Bianchi type-I cosmological model in bimetric relativity .......................................................... 155

GENERAL PHYSICS

M. Ribarič and L. Šusteršič: Framework for finite alternative theories to a quantum field theory .................................................. 161

M. Demetrian: Casimir effect in four situations - including a noncommutative two-sphere ..................................................... 175

A. Raspini: A note on gauge invariance in perturbation theory ............ 191

NUCLEAR PHYSICS

V. A. Bondarenko, J. Honzátko, V. A. Khitrov, A. M. Sukhovoj and I. Tomandl: Two-step cascades of the $^{185}W$ compound nucleus γ-decay 201

ASTROPHYSICS

F. Rahaman: Higher-dimensional global monopole in Lyra’s geometry..... 223
